## CAPABILITIES STATEMENT

Motive Power Marine's Port Angeles Shipyard began its operations in the summer of 2021. Located at 731 Marine Drive, we are steps away from the Port of Port Angeles terminal piers. We have a 19,000sf facility that we use for all our shoreside services. We provide welding repair, fabrication, pipe renewal, mechanical rebuilds and repairs, or any other services our customers need.

With our in-house machining equipment, coupled with our machining partners, we offer a full-service machine shop. From mill and lathe work, to plasma cutting, our machining services are vast.

Whether pier side, at voyage, or shoreside in our shop, we will fulfill our customer's needs.
