Two Shipyards. One Commitment to Excellence.

In 2017, Motive Power Marine's Tacoma Shipyard became Washington State's first fully permitted shipyard in more than 25 years.

From defense contractors to commercial and industrial vessel repair, Motive Power Marine is the Northwest's preferred provider of marine services to support the operation, structural, and logistical needs of our clients.

Meeting strict regularly, quality, and environmental frameworks we ensure every project meets the technical demands of the industry, while maintaining schedule integrity and operational readiness.

QUALITY | CUSTOMER VALUE | INTEGRITY

TACOMA SHIPYARD

401 E Alexander Ave, Bld 407
Tacoma, Washington
Operations began in 2017

PORT ANGELES SHIPYARD

731 Marine Drive
Port Angeles, Washington
Operations began in 2021

Shipyard Capabilities

- Pier-side, voyage and remote location vessel repair services
- Full-service marine industry metal fabrication
- Mill, Lathe and CNC Plasma-Machine shop manufacturing
- ABS/AWS and ASME Certified welders
- Mechanical Repair Services
 - Drives and gear reduction
 - Re-powers
 - Main engine and power generation
- Quality Assurance – quality systems implementation during project performance
- CWI Consulting Services – including weld procedure writing and testing services

Certifications

- SBA HUBZone Certified Small Business
- ISO 9001 Aligned
- Green Marine Environmental Excellence
- ABS, AWS, and ASME certified weld procedures
- On-Staff Certified Weld Inspector
- On-Staff Certified Shipyard Competent Person

SAM Cage Code/NAICS

- SAM Cage Code 7KGE6
- Primary NAICS: 336611 (Shipbuilding/Repair)
- Secondary NAICS: 33271, 33272, 33299, 33242, 33243, 33251, 48832, 48839, 71393, 81131

Notable Projects

Motive Power Marine has serviced a wide variety of vessels through projects encompassing structural, mechanical, electrical, and preservation work. Each project is executed to meet contractual requirements, applicable technical references, and environmental standards. These projects demonstrate our commitment to disciplined planning, multi-trade coordination, and rigorous quality and safety controls from planning through completion.

US Navy | YT-808 Rainier *Drydock Overhaul*

- Structural steel repairs and localized steel renewal
- Hull, deck and topside preservation and coating systems
- Ultrasonic thickness (UT) and visual (VT) inspections
- Electrical system upgrades, including AVR installation
- Exhaust stack tip modification and welding
- Hydraulic system repairs and operational testing
- Dock and sea trial support with QA/QC oversight

Additional Tacoma Capabilities

Drydocking & Graving Docking Services

- Haul-out Ramp 400' x 100' vessels
- Graving Dock 440' x 125' vessels

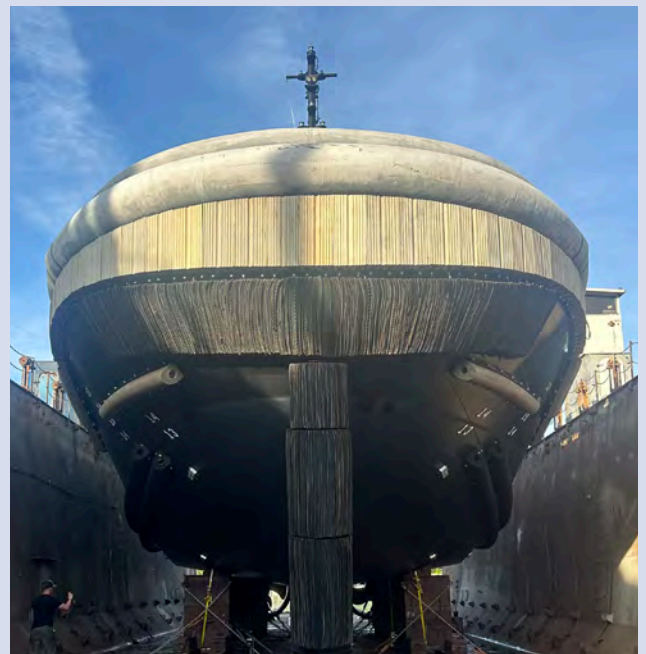

Marine Airbag Haul-outs

- Proven technology used worldwide for more than 25 years.
- 100+ successful docking and undocking evolutions using our airbag haul-out system.

Vessel Deconstruction

- Only Washington Shipyard fully permitted through the Washington Department of Ecology to perform vessel deconstruction on a consistent basis.

400' x 100' x 25' Deck Barge *Docking and Maintenance*

- Complete prep and paint of exterior hull
- Quickly mobilized to complete unanticipated steel repairs
- Voids cleaned, interior staging and additional inspections coordinated seamlessly
- 63,000 lbs of hull plate and internal structure replaced
- 0 quality deficiencies from regulatory or third-party inspection across 97 inspections of steel repair areas
- 6.5 week total project duration
